Long walks, tall tales, big skies

Living Levels Events

July - December 2019

Join us this year for a series of events celebrating the magnificent Gwent Levels. We hope these will encourage you to get out and about and discover this glorious landscape.

There are charges for some of our events but others are free. Where booking is required it will say so on the event description. Information on how to book each event will be given on the events calendar on our website. If booking is not required you can turn up on the day.

With 2019 being the Visit Wales 'Year of Discovery', look out for themed events celebrating our unique coastline. From fun family activities to history discovery days, from illuminating talks to theatrical events – we hope there will be something for everyone to enjoy.

Due to changeable weather in the Gwent Levels, please ensure that you bring appropriate footwear and waterproof clothing for all walks. Don't forget to bring drinks and snacks/suitable clothing/sun cream/insect repellent as appropriate for all outdoor activities.

Please note that other events may be organised after this brochure is distributed,

likewise some events may be subject to cancellation, so keep checking our events calendar on the website for the most up to date information. We will also be popping up at other events in and around the Levels - so look out for us!

For further details, to make event bookings and for updates please check the website www.livinglevels.co.uk.

The Gwent Levels

The Gwent Levels are an iconic, estuarine landscape of international significance. Reclaimed from the sea in Roman times, the Gwent Levels are a network of fertile fields and historic watercourses, known locally as reens. This special landscape of high skies and low horizons is one of the finest examples of a 'natural' landscape hand-crafted by people in Europe; and one of the largest tracts of bio-diverse wet grassland left in the UK.

The Partnership

The Living Levels Partnership was formed in 2014 to promote and protect the Gwent Levels. We are a cross-organisational partnership, spanning administrative boundaries, working closely with communities and other stakeholders towards the sustainable management of this landscape.
